PROFESSIONAL SUMMARY

B.Tech student and aspiring AI/ML Engineer with hands-on project experience in Retrieval-Augmented Generation (RAG), LLM-powered applications using Llama, and machine learning classification using scikit-learn, alongside backend and full-stack engineering experience including API development, database design, authentication, and production deployment.

EDUCATION

SR Group of Institutions

B.Tech

– CGPA: 7.01/10

Jhansi, India

Expected 2028

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, HTML, CSS

AI / Machine Learning: Machine Learning, Generative AI, Large Language Models (LLMs), Llama, AI Agents, Retrieval-Augmented Generation (RAG), Embeddings, Semantic Retrieval, Natural Language Processing (NLP), Prompt Design, AI Application Development

ML Tools: scikit-learn, Principal Component Analysis (PCA), Support Vector Machines (SVM), Feature Scaling, Data Preprocessing, Model Evaluation

Frontend: React.js, Next.js, Tailwind CSS, Context API, React Hooks (useState, useEffect, useContext)

Backend: FastAPI, Express.js, REST APIs, WebSockets, JWT Authentication & Authorization, CORS Handling, API Development

Databases: PostgreSQL, Firebase Firestore, SQLAlchemy ORM, Alembic, Database Design

Tools & Deployment: Git, GitHub, Docker, Firebase, Render, Railway, Vercel, Postman, pgAdmin

PROFESSIONAL EXPERIENCE

Panthar Infohub

Full-Stack Web Developer

June 2026 – Present

- Developing frontend and backend components for client projects, including Unilake, PanthorInfoHub, and KavachX, using Next.js and Express.js.
- Building server-side logic and APIs with Express.js to support client-facing web applications.
- Implementing frontend interfaces with Next.js as part of end-to-end feature delivery for client products.
- Collaborating on multiple concurrent client projects, contributing to both UI implementation and backend functionality.

PROJECTS

Retail Query | LLM + RAG-Powered Retail Query Application

- Built an AI-powered retail query application using Retrieval-Augmented Generation (RAG) and a Llama-based LLM to generate context-aware responses to natural-language queries.
- Developed data-processing pipelines for cleaning, feature scaling, and formatting text data to prepare it for both embedding generation and downstream ML use.
- Generated vector embeddings from processed text and applied semantic retrieval to surface relevant context before passing it to the Llama LLM/agent for response generation.
- Integrated the Llama model as the LLM/agent component to process and respond to natural-language retail queries.

Breast Cancer Prediction | Machine Learning Classification

- Developed a breast cancer classification model using the Breast Cancer Wisconsin dataset with Python and scikit-learn.
- Preprocessed and standardized features using StandardScaler and applied Principal Component Analysis (PCA), retaining approximately 95% of dataset variance.
- Trained and evaluated a Support Vector Machine (SVM) classifier, comparing model performance before and after dimensionality reduction.
- Evaluated classification performance using accuracy, classification reports, confusion matrices, ROC-AUC, and PCA-based visualization.

Bazaario | Enterprise E-Commerce & Resale Platform

- Designed and built scalable backend REST APIs and a PostgreSQL database architecture using FastAPI, SQLAlchemy ORM, and Alembic migrations.
- Implemented Firebase Authentication and integrated Razorpay for secure payment processing across the platform.
- Developed core e-commerce functionality including product browsing, wishlist, cart, product comparison, infinite scrolling, and a Cashify-style resale module, plus an admin dashboard for managing products, orders, users, and resale requests.
- Deployed the full-stack application to production using Vercel and Render, with Docker for containerization.

ACHIEVEMENTS

- **LNMHACKS 7.0** – Participant, national-level hackathon organized by LNM Institute of Information Technology.
- **Dynamic Hackathon** – Attended Q&A session “Building Smarter, Safer Crane Systems,” organized by Dynamic Crane Engineers Pvt. Ltd., powered by i4C.
